Product name:	Product code:
Cooling Tower Performance Test Unit	CMI-NP-1480

Description

Cooling Tower Performance Test Unit is a test unit designed for studying range, approach and efficiency of a forced draft cooling tower.

Technical specification

Tank	30 litres
Power Supply	230 V AC, 50 Hz

Standard Accessories

- Thermometers
- Manual

The Cooling Tower Performance Test Unit is a test unit built for studying range, approach and efficiency of a forced draft cooling tower.

Features

- Packed tower with fan
- Water heater and circulation pump
- Rotameter
- Dry and wet bulb thermometers
- Digital sensors

Technical Specifications

Tower Packing	PVC fill
Water Flow	0 to 10 LPM
Heater	3 kW
Fan	blower 0.25 kW
Sensors	PT100 4 nos
