Product name:	Product code:
Vapour Compression Refrigeration Test Rig	CMI-NP-1483

Description

Vapour Compression Refrigeration Test Rig is a test rig designed for determining COP and performance of a vapour compression cycle.

Technical specification

Temperature Sensors	6 nos
Power Supply	230 V AC, 50 Hz

Standard Accessories

- Thermometers
- Manual

The Vapour Compression Refrigeration Test Rig is a test rig built for determining COP and performance of a vapour compression cycle.

Features

- Compressor, condenser and evaporator
- Pressure and temperature gauges
- Energy meter
- Rotameter
- Transparent sight glass

Technical Specifications

Refrigerant	R134a
Compressor	0.5 HP hermetic
Condenser	air cooled
Evaporator	water bath
Pressure Gauges	2 nos
