Product name:	Product code:
Engine Management System Trainer	CMI-NP-1489

Description

Engine Management System Trainer is a trainer designed for studying ECU, sensors and injectors with simulated engine faults.

Technical specification

Interface	OBD II
Supply	230 V AC, 50 Hz

Standard Accessories

- Scan tool
- Cables
- Manual

The Engine Management System Trainer is a trainer built for studying ECU, sensors and injectors with simulated engine faults.

Features

- ECU with sensors and actuators
- Fault insertion switches
- Scan tool interface
- Live data display
- Wiring diagram on panel

Technical Specifications

ECU	16 bit
Sensors	TPS, MAP, IAT, CTS, O2
Actuators	injectors, ignition coil
Faults	20 selectable
Display	LCD
