Product name:	Product code:
Metallurgical Specimen Mounting Press	CMI-NP-1538

Description

Metallurgical Specimen Mounting Press is a hot compression mounting press which encapsulates small metal samples in bakelite or resin. It is used for preparing specimens in standard cylinders for grinding and polishing.

Technical specification

Timer	0 to 99 min
Cooling	Water jacket
Weight	Approx. 35 kg
Power Supply	230 V AC, 50 Hz, single phase

Metallurgical Specimen Mounting Press is a hot compression mounting press which encapsulates small metal samples in bakelite or resin. It is designed for preparing specimens in standard cylinders for grinding and polishing. Key highlights include heating and cooling in one cycle, digital temperature and time setting and hydraulic hand pump with gauge.

Features

- Heating and cooling in one cycle
- Digital temperature and time setting
- Hydraulic hand pump with gauge
- Interchangeable mould dies
- Safety cover over mould

Technical Specifications

Mould Diameters	25, 30 and 40 mm
Maximum Pressure	300 bar
Heating Temperature	Up to 180 deg C
Heater	1 kW
