Product name:	Product code:
Soxhlet Extraction Apparatus Bed Type	CMI-NP-1554

Description

Soxhlet Extraction Apparatus Bed Type is a laboratory Soxhlet set with an extractor, flask, condenser and heating mantle for continuous solid extraction. It is used for extracting oils and fats from solid samples with a solvent.

Technical specification

Joint	B34
Thimble	33 x 80 mm
Power Supply	230 V AC, 50 Hz, single phase

Soxhlet Extraction Apparatus Bed Type is a laboratory Soxhlet set with an extractor, flask, condenser and heating mantle for continuous solid extraction. It is designed for extracting oils and fats from solid samples with a solvent. Key highlights include standard ground-joint borosilicate glassware, heating mantle with regulator and water cooled Allihn condenser.

Features

- Standard ground-joint borosilicate glassware
- Heating mantle with regulator
- Water cooled Allihn condenser
- Cellulose thimbles
- Stand with clamps

Technical Specifications

Extractor Capacity	250 ml
Flask	500 ml round bottom
Condenser	Allihn, 300 mm
Heating Mantle	500 W with regulator
