Product name:	Product code:
Batch Distillation Column Training Unit	CMI-NP-1555

Description

Batch Distillation Column Training Unit is a bench scale packed distillation column with boiler, condenser and temperature sensors. It is used for training students in batch distillation and reflux operation.

Technical specification

Temperature Range	0 to 200 deg C
Packing	Glass rings
Power Supply	230 V AC, 50 Hz, single phase

Batch Distillation Column Training Unit is a bench scale packed distillation column with boiler, condenser and temperature sensors. It is designed for training students in batch distillation and reflux operation. Key highlights include glass column with packing, reflux ratio control and digital multi-point temperature indicator.

Features

- Glass column with packing
- Reflux ratio control
- Digital multi-point temperature indicator
- Water cooled condenser
- Heating mantle with control

Technical Specifications

Column Diameter	40 mm
Height	1000 mm
Boiler	3 litre
Heater	1.5 kW
