Product name:	Product code:
Profile Projector Bench Type	CMI-NP-1569

Description

Profile Projector Bench Type is an optical comparator with a screen that projects a magnified shadow of small parts for dimension checking. It is used for measuring contours, threads and small component dimensions.

Technical specification

Illumination	Halogen
Angle Reading	1 minute
Power Supply	230 V AC, 50 Hz, single phase

Profile Projector Bench Type is an optical comparator with a screen that projects a magnified shadow of small parts for dimension checking. It is designed for measuring contours, threads and small component dimensions. Key highlights include projection screen with rotating protractor, contour and surface illumination and digital readout stage.

Features

- Projection screen with rotating protractor
- Contour and surface illumination
- Digital readout stage
- 10x 20x 50x lenses
- Rigid cast base

Technical Specifications

Screen Diameter	300 mm
Magnification	10x, 20x, 50x
Stage Travel	150 x 50 mm
Digital Readout	0.001 mm
