Product name:	Product code:
Vocational Automobile Electrical Training Board	CMI-NP-1589

Description

Vocational Automobile Electrical Training Board is a board with battery, alternator, starter motor and lighting circuits for practice. It is used for teaching vehicle electrical circuits and testing.

Technical specification

Voltmeter	Digital, 0 to 20 V
Board	Steel, powder coated

Vocational Automobile Electrical Training Board is a board with battery, alternator, starter motor and lighting circuits for practice. It is designed for teaching vehicle electrical circuits and testing. Key highlights include battery, alternator, starter, lighting and horn circuits and fuse box and relays.

Features

- Battery, alternator, starter
- Lighting and horn circuits
- Fuse box and relays
- Test points
- Digital voltmeter

Technical Specifications

Battery	12 V, 35 Ah
Alternator	12 V, 45 A
Starter Motor	12 V
Fuse Box	Standard
