Product name:	Product code:
Vocational CNC Lathe Trainer Machine	CMI-NP-1594

Description

Vocational CNC Lathe Trainer Machine is a bench top CNC lathe with a three-jaw chuck, tool turret and a control panel for turning practice. It is used for training in CNC turning and G-code programming.

Technical specification

Tool Stations	4
Control	CNC with LCD
Power Supply	230 V AC, 50 Hz, single phase

Vocational CNC Lathe Trainer Machine is a bench top CNC lathe with a three-jaw chuck, tool turret and a control panel for turning practice. It is designed for training in CNC turning and G-code programming. Key highlights include four station tool turret, servo driven axes and spindle speed control.

Features

- Four station tool turret
- Servo driven axes
- Spindle speed control
- Safety door interlock
- Colour display controller

Technical Specifications

Swing	200 mm
Distance Between Centers	300 mm
Spindle Speed	100 to 3000 rpm
Spindle Motor	1.5 kW
