Product name:	Product code:
Vocational CNC Milling Machine Bench Model	CMI-NP-1595

Description

Vocational CNC Milling Machine Bench Model is a benchtop three-axis vertical milling machine with a CNC controller. It is used for learning CNC milling and tool path programming.

Technical specification

Control	CNC with LCD
Power Supply	230 V AC, 50 Hz, single phase

Vocational CNC Milling Machine Bench Model is a benchtop three-axis vertical milling machine with a CNC controller. It is designed for learning CNC milling and tool path programming. Key highlights include ball screw drives, vertical spindle and enclosed work area.

Features

- Ball screw drives
- Vertical spindle
- Enclosed work area
- Coolant system
- USB program transfer

Technical Specifications

Table Size	400 x 150 mm
Travel XYZ	250 x 180 x 200 mm
Spindle	2 hp, 8000 rpm
Tool Holder	ER16
