| Vocational PLC Controlled Pneumatic Trainer | CMI-NP-1606 |

## Description

Vocational PLC Controlled Pneumatic Trainer is a pneumatic setup operated by a programmable logic controller. It is used for teaching automation sequences.

## Technical specification

| | |
|---|---|
| Power Supply | 230 V AC, 50 Hz, single phase |

Vocational PLC Controlled Pneumatic Trainer is a pneumatic setup operated by a programmable logic controller. It is designed for teaching automation sequences. Key highlights include pLC with I/O, cylinders and solenoid valves.

**Features**

- PLC with I/O
- Integrated cylinders for reliable use
- Solenoid valves
- Integrated sensors for reliable use
- Integrated software for reliable use

**Technical Specifications**

| | |
|---|---|
| PLC | 16 I/O |
| Pressure | 6 bar |
| Cylinders | 2 |
| Valves | 5/2 |
| Sensors | Reed switches |
