NAUGRA®

Product name:	Product code:
Vocational Plasma Cutting Machine	CMI-NP-1614

Description

Vocational Plasma Cutting Machine is an inverter plasma cutter with torch and compressed air input. It is used for cutting sheet metal in workshops.

Technical specification

Power Supply	230 V AC, 50 Hz, single phase

Vocational Plasma Cutting Machine is an inverter plasma cutter with torch and compressed air input. It is designed for cutting sheet metal in workshops. Key highlights include pilot arc, air regulator and cuts up to 12 mm.

Features

- Pilot arc
- Air regulator
- Cuts up to 12 mm
- Lightweight body for easy handling
- Overheat protection

Technical Specifications

Cutting Current	20 to 40 A
Cutting Thickness	Up to 12 mm
Air Pressure	4 to 5 bar
Duty Cycle	60 percent
Cooling	Fan
