| Vocational Welding Electrode Oven | CMI-NP-1623 |

## Description

Vocational Welding Electrode Oven is a portable electrode drying oven that keeps rods dry. It is used for drying and storing welding electrodes before use.

## Technical specification

| | |
|---|---|
| Controller | Thermostat |
| Dimensions | 500 x 150 x 150 mm |
| Power Supply | 230 V AC, 50 Hz, single phase |

Vocational Welding Electrode Oven is a portable electrode drying oven that keeps rods dry. It is designed for drying and storing welding electrodes before use. Key highlights include thermostat controlled heating, insulated stainless chamber and holds 5 kg of rods.

**Features**

- Thermostat controlled heating
- Insulated stainless chamber
- Holds 5 kg of rods
- Temperature display
- Carry handle

**Technical Specifications**

| | |
|---|---|
| Capacity | 5 kg |
| Temperature Range | Ambient to 250 deg C |
| Chamber Material | Stainless steel |
| Power | 300 W |
