Product name:	Product code:
Vocational Shell and Tube Heat Exchanger	CMI-NP-1642

Description

Vocational Shell and Tube Heat Exchanger is an exchanger with a shell and tube bundle. It is used for measuring heat transfer between hot and cold water.

Technical specification

Power Supply	230 V AC, 50 Hz, single phase

Vocational Shell and Tube Heat Exchanger is an exchanger with a shell and tube bundle. It is designed for measuring heat transfer between hot and cold water. Key highlights include multiple tubes, flow meters and temperature sensors.

Features

- Multiple tubes
- Flow meters
- Temperature sensors
- Integrated valves for reliable use
- Integrated heater for reliable use

Technical Specifications

Tubes	7
Length	600 mm
Heater	2 kW
Flow	0 to 5 lpm
Sensors	6
