Product name:	Product code:
Vocational Inverter Arc Welding Machine	CMI-NP-1649

Description

Vocational Inverter Arc Welding Machine is a portable IGBT inverter welder for arc welding. It is used for teaching MMA welding with compact equipment.

Technical specification

Power Supply	230 V AC, 50 Hz, single phase

Vocational Inverter Arc Welding Machine is a portable IGBT inverter welder for arc welding. It is designed for teaching MMA welding with compact equipment. Key highlights include lightweight, arc force control and digital display.

Features

- Lightweight body for easy handling
- Arc force control
- Digital display
- Hot start
- Overload protection

Technical Specifications

Current	20 to 200 A
Duty Cycle	60 percent
Electrode	1.6 to 4 mm
Efficiency	85 percent
Weight	6 kg
