NAUGRA®

Product name:	**Product code:**
Vocational Welding Rectifier DC	CMI-NP-1652

Description

Vocational Welding Rectifier DC is a rectifier based DC arc welder with fan cooling. It is used for teaching DC stick arc welding.

Technical specification

Power Supply	415 V AC, 50 Hz, three phase

Vocational Welding Rectifier DC is a rectifier based DC arc welder with fan cooling. It is designed for teaching DC stick arc welding. Key highlights include smooth DC output, current dial and fan cooling.

Features

- Smooth DC output
- Current dial
- Fan cooling
- Thermal protection
- Integrated wheels for reliable use

Technical Specifications

Current	40 to 400 A
Duty Cycle	60 percent
OCV	70 V
Electrode	2.5 to 6 mm
Cooling	Fan
