Product name:	Product code:
FMS Pneumatic Sorting and Transfer Module	CMI-NP-1688

Description

FMS Pneumatic Sorting and Transfer Module is a sorting module with pneumatic diverters which route parts by material and height. It is used for demonstrating branching and sorting paths in a flexible line.

Technical specification

Controller	PLC
Frame	Aluminium profile
Power Supply	230 V AC, 50 Hz, single phase

FMS Pneumatic Sorting and Transfer Module is a sorting module with pneumatic diverters which route parts by material and height. It is designed for demonstrating branching and sorting paths in a flexible line. Key highlights include inductive and capacitive sensors, height measuring sensor and pneumatic diverter cylinders.

Features

- Inductive and capacitive sensors
- Height measuring sensor
- Pneumatic diverter cylinders
- Slide chutes
- Conveyor belt

Technical Specifications

Sensors	Inductive, capacitive, optical
Diverters	3
Chutes	3
Air Supply	6 bar
