NAUGRA®

Product name:	Product code:
BOD Incubator with Humidity Control	CMI-NP-0006

Description

A refrigerated BOD incubator with humidifier and humidity sensor for controlled temperature and relative humidity, used in plant growth, insect rearing, seed germination and stability studies.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Shelves (3 nos.)
- Water reservoir

Along with temperature control down to 10 deg C, this unit regulates humidity between 50 and 90 percent. It supports agricultural, entomology and microbiology experiments needing steady air conditions.

Features

- Temperature and humidity dual control
- Ultrasonic or steam humidifier with water tank
- Stainless steel chamber, adjustable shelves
- Microprocessor controller with alarms

Technical Specifications

Capacity	200 litres
Temperature range	10 deg C to 50 deg C
Humidity range	50 to 90 percent RH
Temperature accuracy	+/- 0.5 deg C
Humidity accuracy	+/- 5 percent RH
Interior	SS 304
