Product name:	Product code:
Pneumatic Drive Training Module	CMI-NP-1713

Description

Pneumatic Drive Training Module is a module with air motor, cylinders and valves on a base. It is used for learning mechanical power transmission by compressed air.

Technical specification

Tubing	8 mm PU
Base	Aluminium profile

Pneumatic Drive Training Module is a module with air motor, cylinders and valves on a base. It is designed for learning mechanical power transmission by compressed air. Key highlights include air motor, double acting cylinders and valves and tubing.

Features

- Air motor
- Double acting cylinders
- Valves and tubing
- Pressure regulator
- Mounting plate

Technical Specifications

Air Motor	0.3 kW
Cylinder	32 mm bore, 100 mm stroke
Pressure	6 bar
Valves	5/2 way
