Product name:	Product code:
Modular Production Robotic Assembly Module	CMI-NP-1730

Description

Modular Production Robotic Assembly Module is a station with a small robotic arm which assembles base and cover parts. It is used for teaching robotic assembly in modular production.

Technical specification

Sensors	Optical
Control	PLC
Power Supply	230 V AC, 50 Hz, single phase

Modular Production Robotic Assembly Module is a station with a small robotic arm which assembles base and cover parts. It is designed for teaching robotic assembly in modular production. Key highlights include four axis robot arm, gripper and part feeders.

Features

- Four axis robot arm
- Integrated gripper for reliable use
- Part feeders
- Vision sensor
- Safety guard

Technical Specifications

Robot	4 axis, 1 kg
Reach	300 mm
Repeatability	+/-0.05 mm
Gripper	Pneumatic
