Product name:	Product code:
Logistics Trainer Barcode Identification Module	CMI-NP-1738

Description

Logistics Trainer Barcode Identification Module is a barcode scanner station. It is used for teaching goods identification.

Technical specification

Logistics Trainer Barcode Identification Module is a barcode scanner station. It is designed for teaching goods identification. Key highlights include scanner, container labels and stopper.

Features

- Integrated scanner for reliable use
- Container labels
- Integrated stopper for reliable use
- Integrated interface for reliable use
- Integrated frame for reliable use

Technical Specifications

Scanner	1D and 2D
Interface	RS-232
Labels	Set of 20
Control	PLC
Frame	Aluminium
Supply	24 V DC
