NAUGRA®

Product name:	Product code:
Universal Motor Speed Control Trainer	CMI-NP-1751

Description

Universal Motor Speed Control Trainer is a trainer for studying speed control of a series universal motor using a phase-angle triac controller. It is used for hands-on training in the drive, control and characteristics of electric motors.

Technical specification

Standard Accessories

- Patch cord set
- Experiment manual
- Mains cord

The Universal Motor Speed Control Trainer is a trainer for studying speed control of a series universal motor using a phase-angle triac controller. It is designed for hands-on training in the drive, control and characteristics of electric motors.

Features

- Front panel with input, program and 4 mm safety sockets
- Overload and short-circuit protection built in
- Compact bench-top unit suitable for group practicals
- Manual with circuit diagrams and observation tables

Technical Specifications

Motor	230 V AC universal, 250 W
Speed control	Triac phase control
Speed range	500 - 8000 rpm
Power supply	230 V AC, 50 Hz, single phase
Protection	MCB and fuse
Construction	Powder-coated MS enclosure
