Product name:	Product code:
Frequency Converter Trainer	CIVIL-ETS-102-0001

Description

Frequency Converter Trainer

Technical specification

Features

1. Speed and direction control of motor using industrial frequency converter
2. Frequency conversion setting of motor load regulator
3. Multi-step speed and time configuration
4. PID control function
5. Input and output of multivariate function
6. Fieldbus network card (optional)

Training Projects

1. Principle of frequency converter
2. Structure and principle of AC motor
3. Application of frequency converter
4. Start and control methods of induction motor
5. PLC remote control
