Product name:	Product code:
Automatic PCB UV Exposure Machine with Vacuum Pump	CMI-NP-1793

Description

Automatic PCB UV Exposure Machine with Vacuum Pump is a fully automated exposure machine that applies vacuum, exposes and releases on a preset cycle.

Technical specification

Construction	Powder-coated MS with acrylic window

Standard Accessories

- Spare UV tube
- Pressure frame
- Mains cord

The Automatic PCB UV Exposure Machine with Vacuum Pump is a fully automated exposure machine that applies vacuum, exposes and releases on a preset cycle. It is designed for exposing photosensitive PCB laminates to UV light when making prototype printed circuit boards.

Features

- Digital timer with automatic cut-off
- Vacuum or pressure frame keeps film in contact
- Safety interlock on lid opening
- Compact and suitable for lab and workshop use

Technical Specifications

Area	A3
Cycle	Auto vacuum, expose, release
Memory	10 programs
Supply	230 V AC, 50 Hz, single phase
UV source	UV-A tubes, 365 - 400 nm
