Product name:	Product code:
LED UV PCB Exposure Machine	CMI-NP-1798

Description

LED UV PCB Exposure Machine is an LED based UV exposure unit with long lamp life and instant start for PCB photo-printing.

Technical specification

Construction	Powder-coated MS with acrylic window

Standard Accessories

- Spare UV tube
- Pressure frame
- Mains cord

The LED UV PCB Exposure Machine is an LED based UV exposure unit with long lamp life and instant start for PCB photo-printing. It is designed for exposing photosensitive PCB laminates to UV light when making prototype printed circuit boards.

Features

- Safety interlock on lid opening
- Compact and suitable for lab and workshop use
- Even UV exposure across the full board area
- Digital timer with automatic cut-off

Technical Specifications

LED wavelength	395 nm
Area	A4
Power	60 W
Supply	230 V AC, 50 Hz, single phase
UV source	UV-A tubes, 365 - 400 nm
