| Large Format PCB UV Exposure Machine | CMI-NP-1799 |

## Description

Large Format PCB UV Exposure Machine is a large size UV exposure machine for panels used in small production and training workshops.

## Technical specification

| | |
|---|---|
| Construction | Powder-coated MS with acrylic window |

**Standard Accessories**

- Spare UV tube
- Pressure frame
- Mains cord

The Large Format PCB UV Exposure Machine is a large size UV exposure machine for panels used in small production and training workshops. It is designed for exposing photosensitive PCB laminates to UV light when making prototype printed circuit boards.
