Product name:	Product code:
Portable PCB Exposure Box with Timer	CMI-NP-1801

Description

Portable PCB Exposure Box with Timer is a lightweight portable UV exposure box for classroom PCB making.

Technical specification

- Spare UV tube
- Pressure frame
- Mains cord

The Portable PCB Exposure Box with Timer is a lightweight portable UV exposure box for classroom PCB making. It is designed for exposing photosensitive PCB laminates to UV light when making prototype printed circuit boards.

Features

- Even UV exposure across the full board area
- Digital timer with automatic cut-off
- Vacuum or pressure frame keeps film in contact
- Safety interlock on lid opening

Technical Specifications

Area	150 x 200 mm
Tubes	2 x 9 W UV
Weight	3 kg
Supply	230 V AC, 50 Hz, single phase
UV source	UV-A tubes, 365 - 400 nm
Construction	Powder-coated MS with acrylic window

Standard Accessories
