Product name:	Product code:
Kjeldahl Steam Generator Unit	CMI-NP-0117

Description

A standalone electric steam generator for Kjeldahl distillation with level control and safety valve, supplied without glass parts for use with existing distillation heads.

Technical specification

Standard Accessories

- Steam hose

It supplies steady steam to the distillation tube. Water level is monitored automatically so the heater is protected.

Features

- Stainless steel boiler
- Level sensor protection
- Pressure safety valve
- Steady steam output
