

Product name:
Welding Robot Training System

Product code:
CIVIL-WRT-111-0001

Description

Welding Robot Training System

Technical specification

Overview

The welding robot training system features a superspeed 6-axis operating mechanism, 1.44m reach distance, and can handle 5kg payloads. This welding equipment is the ideal tool for soldering a variety of materials.

Technical parameters of the welding robot training system

Model number: (other brands are available)

Wrist overweight: 5 kg

Axes: 6-axis

Largest wingspan radius: 1.44m

Protection grade: IP54

Installation: grounded

Positional repeatability: 0.025 mm

Power supply: three-phase 400V (+10%,-15%),50Hz/60Hz,13KVA

Axes: 6-axis
