Product name:	Product code:
Eddy's Hot Plate Analgesiometer	CMI-NP-0184

Description

An analgesiometer with a controlled hot plate for measuring pain response of mice or rats to heat, used in analgesic drug screening.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Animal cylinder
- Stopwatch

The plate is kept at 55 deg C while an animal sits on it and reaction time to paw licking or jumping is measured. This tests central analgesic activity.

Features

- Thermostatically controlled plate
- Digital temperature display
- Transparent animal cylinder
- Digital timer

Technical Specifications

Plate temperature	40 to 70 deg C
Accuracy	+/- 0.5 deg C
Plate size	200 x 200 mm
Cylinder	Acrylic, 150 mm dia
Timer	Digital stopwatch
Display	LED
