Product name:	Product code:
Elevated Plus Maze Apparatus for Anxiety Studies	CMI-NP-0185

Description

An elevated plus maze with two open and two closed arms on legs, used to assess anxiety-like behaviour in mice and rats treated with drugs.

Technical specification

Animal	Mice or rats

Standard Accessories

- Stopwatch

Animals avoid open arms when anxious. Time spent in each arm is recorded to show anxiolytic or anxiogenic effects of drugs.
