NAUGRA®

Product name:	**Product code:**
Operational Amplifier Circuit Trainer	CMI-NP-1888

Description

Operational Amplifier Circuit Trainer is a portable trainer for inverting, non-inverting, summing, integrator and differentiator op-amp circuits.

Technical specification

Case	ABS or powder-coated enclosure

Standard Accessories

- Patch cords
- Breadboard wires
- Manual

The Operational Amplifier Circuit Trainer is a portable trainer for inverting, non-inverting, summing, integrator and differentiator op-amp circuits. It is designed for building and testing analogue circuits with op-amps, amplifiers, oscillators and power supplies.

Features

- Built-in regulated power supplies and function generator
- Breadboard area for building circuits
- Protected outputs with fuses
- Portable carry case design

Technical Specifications

Op-amps	IC 741 and LM324
Function generator	1 Hz - 100 kHz
Display	3.5 digit meter
Supply	230 V AC, 50 Hz, single phase
DC outputs	+/- 12 V, +5 V
