Product name:	Product code:
Digital Soxhlet Extraction Unit 4 Place	CMI-NP-0212

Description

A four place digital Soxhlet extraction unit with temperature controlled heating for fat extraction, with precise heat and a compact stainless steel frame.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Thimbles
- Glass beads

A digital controller sets temperature for the four positions together. The unit is used in food testing laboratories that need repeatable extraction.
