Product name:	Product code:
Angle of Repose Apparatus for Powders	CMI-NP-0218

Description

An angle of repose apparatus measuring flow properties of powders and granules by forming a cone from a fixed height funnel and finding the cone angle.

Technical specification

Stand	Rod and clamp

Standard Accessories

- Base plate

A funnel with a fixed orifice drops powder onto a circular base and the pile height and radius are measured. The calculated angle shows how easily powder flows.

Features

- Fixed height funnel
- Circular base plate
- Graduated scale
- Easy to use

Technical Specifications

Funnel	Stainless steel
Funnel height	Adjustable 2 to 10 cm
Base diameter	100 mm
Orifice	10 mm
Material	SS 304 and acrylic
Measurement	Height and radius by scale
