Product name:	Product code:
Digital Tapped Density Tester Dual Station	CMI-NP-0220

Description

A dual station tapped density tester that taps graduated cylinders for a preset number of taps, used in pharmaceutical and powder laboratories to measure tapped density.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Cylinders (2 nos.)

Two cylinders are raised and dropped at 250 taps per minute. Density and Carr index are calculated from the volume change.
