NAUGRA®

Product name:	Product code:
Glass Water Still 2 LPH	CMI-NP-0243

Description

A borosilicate glass water still for producing distilled water at two litres per hour in small laboratories. Used in schools and colleges. Features include borosilicate glass construction, immersion heating and low water cut off.

Technical specification

Conductivity	Less than 3 microsiemens per cm
Mounting	Table top
Supply	230 V AC 50 Hz

Standard Accessories

- Collection bottle
- Tubing

The boiler and condenser are fitted to a heater unit and run on mains water for cooling. The glass construction helps keep the water pure.
