NAUGRA®

Product name:	Product code:
Pull Off Adhesion Tester	CMI-NP-0250

Description

A portable tester that measures the tensile bond strength of coatings, repair mortars and overlays on concrete. Used for quality control of surface repairs. Features include digital reading, hand pump or screw drive and different dolly sizes.

Technical specification

Power	Rechargeable battery
Weight	Approx. 5 kg

Standard Accessories

- Steel dollies
- Adhesive
- Carry case

A metal dolly is glued on the surface and pulled until it detaches. The pull-off strength is read on the display.

Features

- Digital reading
- Hand pump or screw type
- Different dolly sizes
- Peak hold function
- Portable

Technical Specifications

Pull force range	0 to 20 kN
Dolly diameter	50 mm
Accuracy	+/- 1 percent
Display	Digital
Standard	ASTM D4541 and IS 516
Resolution	0.01 kN
