Product name:	Product code:
Centrifugal Governor Apparatus	CMI-NP-0298

Description

A model of centrifugal governor such as Watt, Porter and Proell types for studying speed regulation. Used in theory of machines labs. Features include interchangeable governor types, variable speed drive and sleeve lift scale.

Technical specification

Guard	Acrylic
Supply	230 V AC 50 Hz

Standard Accessories

- Weights
- Tachometer

The spindle is rotated at various speeds and the sleeve lift is recorded. A graph of speed versus sleeve lift is plotted.

Features

- Interchangeable governor types
- Variable speed drive
- Sleeve lift scale
- Digital tachometer
- Transparent guard

Technical Specifications

Types	Watt, Porter, Proell, Hartnell
Motor	1/2 HP
Speed	0 to 600 rpm
Sleeve lift	0 to 100 mm
Scale	Millimetre
Base	Steel
