Product name:	Product code:
Joule's Mechanical Equivalent of Heat Apparatus	CMI-NP-0305

Description

A set with paddle wheel calorimeter and falling weights to find the mechanical equivalent of heat. Used in thermodynamics labs. Features include insulated calorimeter, paddle wheel and weights and pulley.

Technical specification

Paddles	Brass
Insulation	Foam
Measurement	Temperature rise

Standard Accessories

- Weights
- Thermometer

Falling weights turn paddles in water and the temperature rise gives the energy equivalent of work done. Key specifications include calorimeter of Copper 500 ml and weights of 2 x 5 kg.

Features

- Insulated calorimeter
- Paddle wheel
- Weights and pulley
- Digital thermometer
- Sturdy stand

Technical Specifications

Calorimeter	Copper 500 ml
Weights	2 x 5 kg
Drop	Approx. 1.5 m
Thermometer	Digital 0.1 deg C
Stand	Steel
