Product name:	Product code:
Parallel Operation of Transformers Panel	CMI-NP-0339

Description

A panel for paralleling two single phase transformers and finding load sharing. Used in labs. Features include two transformers, switches and meters.

Technical specification

Tests	Load sharing
Frame	Steel

Standard Accessories

- Cords

Two transformers are joined and loaded. Key specifications include transformers of 2 x 1 kVA and voltage of 230/115 V.

Features

- Two transformers
- Switches
- Meters
- Load
- Protection
