Product name:	Product code:
Motorised Initial Pinch Three Roll Bender	CMI-NP-0349

Description

A motorised bender with initial pinch for rolling sheet and plate without flat ends. Used in sheet metal shops. Features include initial pinch action, motor drive and hardened rolls.

Technical specification

Min diameter	250 mm
Weight	Approx. 1100 kg

Standard Accessories

- Foot switch
- Tool kit

The two rolls pinch the plate to give a closer start to the bend. A gearbox drives the rolls.

Features

- Initial pinch action
- Motor drive
- Hardened rolls
- Reversible
- Foot switch
