NAUGRA®

Product name:	Product code:
Four Roll Plate Bending Machine Hydraulic	CMI-NP-0355

Description

A four roll bending machine with a side feeding facility for plate bending without pre bending. Used in fabrication shops. Features include four roll hydraulic design, pre bending without flats and hardened rolls.

Technical specification

Rolls	Alloy steel
Weight	Approx. 4500 kg

Standard Accessories

- Control pendant
- Tool kit

Four rolls hold the plate and bend both ends without turning the plate over. The hydraulic cylinder applies the force.

Features

- Four roll hydraulic design
- Pre-bending without turning
- Hardened rolls
- Digital readout
- Overload valve
