Product name:	Product code:
Vernier Hook And Point Gauges	Hydraulics0019

Description

Vernier Hook And Point Gauges

Technical specification

- Measurement of mechanical deformation

Technical Specification ofVernier Hook And Point Gauges

- Ranges: 150mm, 300mm, 450mm
- Resolution: ±0.10mm
- Typical accuracy: ±0.20mm
- Repeatability: ±0.10mm

Vernier Hook And Point Gauges To cater the increasing requirements of our valued clients, we are offering a large array of **Vernier Hook And Point Gauges** to our valued customers. As per the precise requirement of our clients, we are offering these products in various stipulations. This is a clamped and suitable for support structure and a gauging rod is free to slide up and down over the water surface.
