

Product name:
Servo Motor Trainer

Product code:
CIVIL-SMT-134-0001

Description

Servo Motor Trainer

Technical specification

Features

1. Position and speed control of industrial components
2. Position control and speed control drive
3. Free movement under the coordination of X-Y
4. Stable aluminum frame
5. Pneumatic cylinder and solenoid valve
6. A maximum of 31 position control points

Training Projects

1. Position / speed / torque control
2. Absolute / relative position control
3. Sequence control of position
4. Location selection through the I/O terminal
5. Origin function
6. Various position commands of pulse control
