Product name:	Product code:
Laboratory Pan Type Concrete Mixer	CMI-NP-0446

Description

Counter-current pan mixer with a rotating paddle for thorough mixing of small concrete and mortar batches. Used in testing laboratories to prepare uniform trial mixes for cube and beam specimens.

Technical specification

Discharge	Bottom gate manual
Overall height	1000 mm
Weight approx.	180 kg

Standard Accessories

- Operating manual
- Set of basic tools

Laboratory Pan Type Concrete Mixer is built for engineering colleges, polytechnics, ITIs and technical training workshops. Counter-current pan mixer with a rotating paddle for thorough mixing of small concrete and mortar batches.

Features

- Counter-current paddles for fast mixing
- Bottom discharge gate
- Replaceable wear liner
- Safety cover with limit switch
- Low height charging

Technical Specifications

Pan capacity	40 L
Mixed output	30 L
Motor	1.5 HP, 230 V AC, 50 Hz
Paddle speed	45 rpm
Pan material	Mild steel with wear liner
