NAUGRA®

Product name:	Product code:
Experimental Setup For V And Curves Of Synchronous Motor	EEA0001

Description

Experimental Setup For V And Curves Of Synchronous Motor

Technical specification

Experimental Setup For V And Curves Of Synchronous Motor Manufacturer

Being one of the leading manufacturers and suppliers, we offer sync motors in various sizes and grades as per the requirements of clients at reasonable prices. These are manufactured using high quality raw materials sourced from reliable vendors. Further, we experiment with the help of these motors in order to find the reliability and durability. Following are the experiments conducted on these motors are:

All necessary meters including 3ph power factor meter are mounted on panel.
To study V and A curves of synchronous Motor with Mechanical / Electrical loading.
