NAUGRA®

Product name:	Product code:
Hydraulic Concrete Block Making Machine	CMI-NP-0494

Description

Hydraulic press block machine that compacts concrete in a mould for dense blocks. Used in civil workshops to demonstrate block manufacturing. Main ratings: block size 400 x 200 x 200 mm, output 250 blocks per hour, press Hydraulic 20 tonne.

Technical specification

Mould	Steel
Cycle time	15 s
Weight approx.	900 kg
Pallet size	400 x 450 mm

Standard Accessories

- Operating manual
- Set of basic tools

Hydraulic Concrete Block Making Machine is built for engineering colleges, polytechnics, ITIs and technical training workshops. Hydraulic press block machine that compacts concrete in a mould for dense blocks.

Features

- Hydraulic compaction
- Uniform block density
- Quick mould change
- Push button control
- Rigid frame

Technical Specifications

Block size	400 x 200 x 200 mm
Output	250 blocks per hour
Press	Hydraulic 20 tonne
Motor	3 HP, 415 V AC
