NAUGRA®

Product name:	Product code:
Radial Arm Drilling Cum Tapping Machine	CMI-NP-0535

Description

Radial arm drilling cum tapping machine with a swinging arm and reversing spindle, used for drilling and tapping holes in large or heavy workpieces without repositioning the job.

Technical specification

Motor	2 HP, 415 V, 3 phase
Base working surface	900 x 600 mm

Standard Accessories

- Drill chuck with arbor
- Tapping chuck
- Coolant set

The Radial Arm Drilling Cum Tapping Machine combines a radial arm drill with an automatic reversing tapping spindle. The arm swings and the head traverses so holes can be drilled and tapped across a large workpiece in one setting.

Features

- Swinging radial arm with head traverse
- Automatic spindle reversal for tapping
- Multiple spindle speeds by gearbox
- Heavy cast iron column and base
- Coolant pump with tank

Technical Specifications

Drilling capacity in steel	32 mm
Tapping capacity	M20
Arm length	900 mm
Spindle taper	MT 4
Spindle speeds	8 steps, 60 to 1200 rpm
