| Worm Wheel Hobbing Machine | CMI-NP-0575 |

## Description

Special hobbing machine with tangential feed for cutting worm wheels. Used in gear laboratories to demonstrate the production of worm gear sets. Main ratings: max module 4 mm, max diameter 250 mm, motor 3 HP, 415 V AC.

## Technical specification

| | |
|---|---|
| Table | Rotary |
| Coolant | Pump |
| Weight approx. | 1300 kg |

**Standard Accessories**

- Operating manual
- Set of basic tools

Worm Wheel Hobbing Machine is built for engineering colleges, polytechnics, ITIs and technical training workshops. Special hobbing machine with tangential feed for cutting worm wheels.
