NAUGRA®

Product name:	Product code:
Cylindrical Grinding Machine	CMI-NP-0578

Description

Grinding machine for finishing the outside diameter of shafts held between centres. Used in precision machining laboratories to teach cylindrical grinding. Main ratings: swing 150 mm, distance between centres 300 mm, wheel size 250 x 25 mm.

Technical specification

Work speeds	4 steps
Feed	Hand
Accuracy	0.005 mm
Weight approx.	900 kg

Standard Accessories

- Operating manual
- Set of basic tools

Cylindrical Grinding Machine is built for engineering colleges, polytechnics, ITIs and technical training workshops. Grinding machine for finishing the outside diameter of shafts held between centres.

Features

- Between centres 300 mm
- Fine cross feed
- Wheel guard
- Coolant system
- Precision spindle

Technical Specifications

Swing	150 mm
Distance between centres	300 mm
Wheel size	250 x 25 mm
Motor	2 HP, 415 V AC
